Park off the road in this area.

CLIMB/ROUTE C: From the 3-way fork take the right branch, hiking E 0.2 miles to a sign "Pepperwood Trail; Pepperwood Spring 4.2 miles, Sombrero Peak 5.0 miles". Continue ENE over the saddle for about 1.5 mile to the W ridge of Sombrero, turning right (E) and following it to the summit. NOTE: Sombrero Peak is not visible along a large portion of this route. CLIMB ALTERNATE ROUTE: From the A/B parking area, follow route A to the end of the wash at 2700'. Turn left and look for a faint use trail heading up the left side of the drainage across from the ridge the A route follows. Take this path to a flattish area above, and join route B over point 3840+, continuing to follow the faint path. It will end just below the summit boulders. An easy scramble will put you on top.
